

Dover's Pump Solutions Group Acquires Quattroflow® Fluid Systems

Downers Grove, IL – January 2nd, 2012 – Pump Solutions Group (PSG), a business unit operating within the Fluid Solutions platform of Dover's Engineered Systems a segment of Dover Corporation (NYSE: DOV) is proud to announce the acquisition of Quattroflow® Fluid System GmbH & Co. KG in Germany.

QuattroFlow's positive displacement pumps incorporate a four piston-diaphragm technology with no mechanical seals that is driven by an eccentric shaft and motor. Quattroflow® products primarily serve the pharmaceutical and biotech industries that require high containment, purity and cleanability. This innovative pump technology can be found in multiple or single use applications such as cross-flow systems, chromatography devices and centrifuges. Quattroflow® products are known for transferring shear sensitive media of aqueous solutions and biological products such as blood by-products to vaccines without damage, ultimately ensuring product safety, efficiency and reliability.

Dean Douglas, President of Dover's Pump Solutions Group said, "This acquisition is consistent with PSG's strategic vision. We believe that Quattroflow's strengthens our PSG product portfolio and adds greater technological depth to our core markets of Pharmaceutical and Bio Tech. Quattroflows innovative technology will complement PSG's Hygienic product portfolio, ultimately providing our customers the best solution and Total Cost of Ownership for any particular application within the markets we serve".

The Pump Solutions Group (PSG) was formed to deliver cohesion, synergies and relevant value to customers with superior products, world class operations, and a commitment to the fluid transfer space. PSG welcomes Quattroflow® to a family portfolio of premium pump technologies that service a broad array of quality industrial applications and includes global brands Almatec®, Blackmer®, EnviroGear®, Griswold®, Mouvex®, Neptune®, RedScrew® and Wilden®.
